## Insightful reviews

---

Marte Patel: Utter drivel. The book was badly written, righteous, condescending, preachy, and worst of all, the ending was morally questionable. All the fables and stories are stolen from elsewhere, religious ideas and spirituality are badly mixed, and everything is so **obvious**

The book harps on about tapping into the Soul of the World, the Language of the World, about your one true path and other nonsense. The basic idea is that if you really want something and "listen to your heart", the whole universe will help you achieve it if you only look for omens. A questionable idea in a world where people no longer want to work hard and achieve independently.

It reads like a really bad self-help book written for 8 year old children and disguised as a symbolic parable. I read a lot of books and I can safely say this is the worst book I have ever read. It's only saving grace was that it was mercifully short.

2007

Sithara: I need to start this review by stating 1) I can't stand self-help books and 2) I'm a feminist (no, I don't hate men- some men are quite awesome, but I am very conscious of women and our place in the world.)

Short summary (mild spoilers): A boy named Santiago follows his 'Personal Legend' in traveling from Spain to the Pyramids in Egypt searching for treasure. Along the way, he learns 'the Language of the World' the 'Soul of the World' and discovers that the 'Soul of God' is 'his own soul.'

If the statements in quotes above ('personal legend', etc) fascinate you, then you'll enjoy this book. If you think they are hokey and silly, then you'll think this is a terrible book. If you think statements such as "When you want something, all the universe conspires you to achieve it" and "All things are one" are moving and life-changing, you'll love this book. If such statements have you rolling your eyes, then this isn't your cup of tea.

Its not that I find anything wrong with these messages. They are important, but must be balanced with responsibility. In my experience, 'following your dreams' (or personal legend) is not the only way toward wisdom and strength. Is the person who struggles to put food on the table every day for his or her family, consciously realizing that he or she may not be following his or her 'personal legend' any less heroic than some traveler who leaves everything and everyone he or she is responsible for to go on a spiritual quest? Coelho comes close to labeling such people, as losers in life, which I find completely off the mark as some of these people have the most to offer in terms of wisdom.

The issue of responsibility is also part of this book's sexism. The main male characters in the

---

novel have 'Personal Legends' - they are either seeking them, or have achieved them, or have failed to achieve them. But Coelho never mentions 'Personal Legend' with regard to women, other than to say that Fatima, Santiago's fiance, is 'a part of Santiago's Personal Legend.' That's fine, but what about her own Personal Legend? Instead of traveling to find her dreams, she is content to sit around, do chores, and stare everyday at the desert to wait for his return. This is her 'fate' as a desert woman. The fact that women don't have Personal Legends is even more galling considering the fact that according to Coelho, even minerals such as lead and copper have Personal Legends, allowing them to 'evolve' to something better (ie, gold).

In the ideal world presented in *THE ALCHEMIST*, it seems that the job of men is to seek out their personal legends, leaving aside thoughts of family and responsibility, and it's the job of women to let them, and pine for their return. Of course, someone has to do the unheroic, inconvenient work of taking care of the children, the animals, the elderly, the ill... If everyone simply goes off on spiritual quests, deciding they have no responsibility other than to seek their Personal Legends, no one would be taking responsibility for the unglamorous work that simply has to take place for the world to run.

On the other hand, what if both men and women are allowed to struggle towards their 'Personal Legends,' and help each other as best as they can towards them, but recognize that their responsibilities may force them to defer, compromise, or even 'sacrifice' their dreams? This may seem depressing, but it isn't necessarily. Coelho seems to think that Personal Legends are fixed at childhood (or at birth, or even before) and are not changeable: they have to be followed through to the end, no matter how silly. But in my experience, many people have chosen to adjust, compromise, and even 'give up' on their dreams, only to find that life grants them something better, or they have a new, better dream to follow, a path providing greater wisdom. For me, these people have a more realistic, more humble, more fair, and less clichéd vision of the world than Paulo Coelho's vision in *THE ALCHEMIST*.

Nefik: In her review, Ioana wrote:...."The language is sort of simple, which are appealing (read: Herman Hesse); but it comes off as rather redundant and sermonic. another sentence includes not less than one connection with both "The Soul of the World", or "The own Legend", or "Follow Your Heart" with a massive fat capital H. through the top of the radical i'm skimming so much passages. The characters are flat (I did not particularly "feel" them, what they have been going through, and there has been no personality development), and the storyline resembled that of a kid's folktale (I like folktales). Overall, it was once an invaluable learn on condition that it in simple terms took a pair hours, awarded a few attention-grabbing principles (albeit, with no illustrating any of them satisfactorily), and got rid of me to the Spanish countryside/Arabian desolate tract for a piece (I am a sucker for folktales, and if this booklet is not anything else, it's going to make a stunning illustrated kid's book)." I imagine this sums up in a number of phrases what the booklet is about. Simple. think Good. Motivational. Folktale. It additionally brings some of the luggage of these topics with that. definitely it from time to time does seem to be in a position to succeed in deep inside of humans like Corie whom acknowledged in her review: "If you're looking for a pleasant meaty ebook jam-packed with twists, turns and life-like characters - this isn't your book. Wait till you're extra in an extra introspective mood. Coelho's prose is simplistic

---

and now and then childish. And the learn is straightforward - i stopped in round an hour and a part I suppose. however the meanings left scattered through the chapters are severe and authentic. Omens and indicators - throughout us, the universe directing us and aiding us, short of us to succeed. All we need to do is remember - to listen. "and Micha does upload an excellent aspect opposed to it:"Let me simply aspect to the truth that there's now an "Illustrated Alchemist" model of the book. If ones in my opinion philosophy should be illustrated as a comic then maybe it's a tad bit at the easy side. "Despite all this i might need to disagree with April's reviews in Eleanor's review:"This ebook is meant for individuals with ardour and drive. Its not only a unique - for leisure reading. the tale is easy - exactly! thats the wonderful thing about the ebook - its simplicity. yet with that simplicity is a posh philosophy that you just evidently do not get since you took the tale literally."The e-book i might say caters to individuals with melancholy and absence of force greater than it inspires. Deep down, I felt i used to be interpreting for leisure and that is why it got here off as complicated to me simply because deep down the protagonist is a Mary Sue and that is why it caters to me simply because like a Mary Sue performed well, it attempts to attach the reader who's apathetic or hopeless or depressed and attempts to teach them that perhaps there's something in the market simply worthy greedy for and but i am getting a sense that individuals who do seize for the message within the Alchemist will locate that the e-book isn't really deep in any respect and positively the various different reports thoroughly signify that.That's why I rated it as amazing. it is only one of these books that not anyone can particularly inform anyone how undesirable it's until eventually the reader really reveals out for himself and that i doubt those that have learn many books will locate it staggering all of it yet no longer all people reads a a whole lot books and for what it really is worth, i feel a booklet that may connect itself and encourage a person to learn extra merits no much less a score than amazing.The Alchemist is just that sort of ebook that manages to take action through being brief enough, shallow enough, deep adequate and hyped adequate to cater to a iteration of informal readers.

Christopher: i actually disliked this book. I dislike it within the method that I dislike loads of smooth self support books. Their simple message is if you will have whatever to happen, you must wish it as not easy as you can, with out being concerned approximately something else, no longer permitting your self to doubt it, or allow criticisms gets within the method then it's going to happen.I disagree with this notion, not just since it is false, yet since it is bad.Just simply because we wish something, doesn't make it good. this concept of 'following your heart' is frequently wrong. who're we to be the arbiters of truth? Why should still our hearts be resources of knowledge that transcend logic, doubt and reasoning? have not all of us wanted issues that experience grew to become out not to be in our greatest interest, or to be damaging to others? Andrew Jackson used to be a guy identified to have loads of integrity. He used to be constantly 'true' to himself and his heart. Andrew Jackson is the guy who initiated the 'Trail of Tears'. relocating local american citizens from their houses and into reservations. Next, this concept of no longer letting ourselves doubt or examine doubts. it is a bad and cheating solution to live. If we do not ponder doubts, and entertain them often, then we're intentionally blinding ourselves. intentionally making ourselves ignorant. If an individual does not supply critical attention to the concept that they're wrong. supply critical notion to why they suspect what they do, and that maybe those that doubt them will be correct, then they're behaving in a deadly and cheating way.Not giving heed to the troubles doubts and criticisms of others is whatever i feel is an incredible fault in sleek society. Often, humans fail to acknowledge the desires of the gang

---

and the community. We position quite a bit emphasis at the wishes and rights of the individual. This factors humans to concentration quite a bit on themselves to the detriment of others round them. At times, it may be valuable to move opposed to the group, yet one should still first provide severe attention to the teams concerns. According to rules just like the Alchemist, teams like, the Westboro Baptist Church, (godhatesfags.com) might be obvious as American heroes. those are those that take a wholly irrational stance, and persist with it as difficult as they could in entire defiance to the perspectives of everybody round them.

Lamski Kikita: "when you really need something, the total universe conspires in aiding you to accomplish it" This ebook has crossed the bounds of books, and has taken a lifetime of its own, making a circulate everywhere in the globe. Santiago's trip and non secular quest, the folks he meets, the desires he has, the omens he encounters, and the character he speaks to, are all issues that we will be able to relate to..things that we have both forgotten approximately or just brushed off as adolescence fantasies. it's all approximately discovering your own Legend and pursuing your dream despite any hurdles, and approximately being spiritually hooked up to the universe, that is a part of us, and a part of God. we're all one. Reading this publication continually units me again at the correct direction in the direction of attaining the goals i've got wear hold. We continually try and do what each person expects people like pursuing a occupation that you simply hate simply because that's what all people does. spotting my own legend, with the ability to seek advice from the trees, sky, ants, the center of the earth, the air particles, and to my heart, feeling a deeper non secular reference to everything/everyone that's round me, feeling God within me, and never being petrified of failing or dealing with demanding situations are only a number of the few issues this booklet has given me. It is maktub that Coelho writes this book, stocks it with the world, and impact such a lot of lives. This masterwork is a legend and a useful treasure.
