## Description

Fascinating...Klass writes with wit, intelligence, and a great deal of insight."—*The New York Times Book Review*.

## Insightful reviews

M:

Peter: This is a fairly intimidating book. It consists of essays written by the author as she progressed through medical school into internship, having a child and quite a lot of doubts along the way. I liked the unusually frank portrayal of med students, interns, residents and general hospital care. I would recommend this book to anyone aiming for medical school but only in conjunction with something a bit more upbeat.

Tasila: Interesting play with words and a behind the scenes look at the medical training and profession .

Kymberlie: This auto-biography of a tender scientific scholar in the course of her internship and residency particularly is helping one comprehend what a physician learns, not just academically and clinically, but additionally psychologically. She records how she used to be taught to distance herself from her patients, anything she by no means desired to do in turning into a physician. Dr. Klass has additionally had various columns in Parenting magazine.

Carrie Pirmann: books i have read,memoir

Isabel: I had learn this freshman year, yet re-read now. it really is med-nerd publication number one in a chain of med-nerd books that I plan on reading. i believe love it can be a section out of date, yet it is a simple read, and makes me imagine that i would no longer really die during this process. Maybe.
