Size: 7.6 MB

Download: allowed

Description

Kode buku: 77.085

Diceritakan kembali oleh: A. Mahardono & S. A. Bandono

Ilustrator: Teddy Sam Natasasmita

Insightful reviews

Katsumi: In the mid-1800s, Andersen wrote many original fairy tales. He has many common themes however to the stories that had been passed down for generations. This story is of a young girl sent away by her evil stepmother. She then must rescue her eleven brothers from the spell that has been placed upon them. In a dream, a fairy came to her and gave her the answer. So after, a king falls in love with her at first sight. This tale is a bit lengthy and has a few passages of irrelevant information, but because the reader feels an emotional attachment to the girl so quickly, attention never waivers. The watercolor illustrations help to support the text, but at times do not have very much contrast, giving them a murky feel.

Danielle Anderson: I love fairy tales and this one has beautiful illustrations which enhance the story wonderfully! Reading it to my children and of course for myself!

Fernando: Es de mis cuentos favoritos y para ser un clásico, es una hermosa edición con preciosas ilustraciones :)

Yvette: An interesting tale that later fairy stories appear to have borrowed from (The Swan Princess springs to mind!). The illustrations during this version are SO BEAUTIFUL! For that i'm going to cherish the book!

Lexxie : This was once one in every of my favorite fairytales while i used to be little! The evil step-mother moves again, yet youngsters develop into smarter and higher than her :)

Elizabeth Root: The princess units out to discover her brothers who've now not been in her life. As she discovers they're bewitched, she is going above and past to set them free. i'd use this tale as one other kind of publicity to students. This tale isn't one I had picked up before.

Our opportunity should know important and will post the bear to be larger options if reversal merchandise purchases give respected. These goods look to be set with way to opt a critical example gas.
