Description

Fear casts a long shadow....

IN A CITY RULED BY FEAR...

...a solitary figure shrouded in black walked the night, determined to awaken a terrified metropolis from the nightmare of crime. There was nothing -- no bullets, and certainly not legal technicalities -- that could deter the man they called Nemesis from his mission.

Deborah O'Roarke, an idealistic young prosecutor waging her own war against crime, owed Nemesis her very life. She shared his passion for justice, yet she could not accept his lawless methods. Still, though she fought her unwelcome desire for this disturbing stranger, she was unable to deny her longing to share the shadows that were his home....

Insightful reviews

Nandhini Sathyamurthy: This is the second book to the Night Series by Nora Roberts. Content-wise - I was *slightly* more satisfied compared to Night Shift! The story sets off in the slums and alleys of Urbana, with a very disciplined public defender Deb and the *business-man-by-day, Superman-by-night* Gage Guthrie playing the leads to this plot. Though their approach is different - their target is the one and same person who is a Drug trafficker. (Carlos Montega) The story line can be summarized to a war of Ethics over Superheroism.

Deb is a charming, vibrant public defender who is naive, sexy and oh my, she doesn't know that she actually *is* sexy! Good Lord! While *Night Shift* was fully focused on sex, erotica and the so-called feelings, Nora Roberts adds a whiff of Super human abilities to Gage in this tale. Going across to the state of coma, Guthrie is blessed only to recover with the power to turn invisible at will. Does the author expect her readers to be fools, taking in the plot as she shoves it? Yes, there's a limit to patience and logic - and Nora Roberts breaches both of them effortlessly! How is it that all her protagonist men are Multi-billionaires with a love to protecting the law and thereby choosing to become Cops? I'll never understand WHY they're all filthy rich, yet fall for an average lady.

And always - ALWAYS - *Nora Roberts'* leading lady is a hot woman who doesn't know that she is THAT sexy. She turns down our man, she stamps his attempts all along, only to fall into the bed with him later and confess that she had loved him from the beginning. Of course, let's not forget - The lady also feels mixed and confused about her feelings and doesn't get it straight until she has had wild, carnal sex with the man! Half the book, Deb is either kissing or making love with Gage; Either that, or she's saying "*I don't know if what I'm feeling for you is right Gage.. I wish I could understand myself!*" The plot is decent, but I only wish the author knew how to write so that she'd keep her audience hooked till the end. The murders and death pass by casually without leaving the slightest feeling of thrill or alarm. That's how flat and boring it is, across those portions!

Stay away from this book. This isn't even worth being on the casual, pleasure read list. It took me a very long time to get done with it. And worse - I even slept while reading this book once! Shucks.

Liza Wiemer: Night Shadow (Book two in the series) was completely addicting. Is there anything that Nora Roberts can't write? I loved the superhero Nemesis and I loved the girl he fell in love with (Deborah). She's introduced in book 1, and is now a public defender in Urbana. Yup. Addicted. I'll be reading the entire series.

Saly: This book was kind of weird, with a hero who led a double life, as an ex-cop turned businessman and a super-hero of sorts, working at night in a mask protecting people and having the power of invisibility, then he meets ethical ADA Deborah (the sister of the heroine from Night Shift) and falls for her.

Deb believes in the law and feels the pull towards two men who turn out to be one and she doesn't know how to reconcile her job with the secrets the man she loves keeps.

The story moves too fast, with an evil organization in the middle responsible for what happened to the hero when he was on the force, I found the ending too abrupt.

Kim: i don't comprehend why this tale needed to dip into delusion (which of Nora Roberts I often love) while the opposite three tales within the sequence have been primarily grounded in reality.

Christina: brief and sweet. a superb learn in case you don't desire to begin a whole dating with a chain or desire a holiday from them!
