Description

When the youngest member of the Runaways is separated from her teammates, Molly Hayes must survive a night alone on the mean streets of Los Angeles! The 11-year-old mutant girl soon hooks up with a new group of runaways, but is their mysterious leader a hero or a villain? Collects Runaways #13-18.

Insightful reviews

Kate: Runaways: parental guidance Vol 6 #13-18

Art: Hideous even by manga standards the proportions of some of the characters looked like bobble heads the artwork was garish and no gust artist to make it better F

Characters: The gang is all here the drama is heighten high. Nico's secret kiss with chase is out, chase and Gertrude well you'll have to read to see. Characters come back and someone dies as well as new characters being introduced the characters here don't really change much personality wise. There relationships are tested and broken but nothing really changed they still acted the same B+

Story: Odd even by doctor who fan's standards but still fun some aspects were very cool and plausible others weren't as forgivable. The first story in here is molly based and it gives you a "what?" factor because last time we left molly she was with the guy in NYC but she's now some how underground? Oh and this is rich an evil teacher who is a mix between Fagin and your usual B list villain turning kids to stone and then...it was a dream? Or was it? The ending of that little story is left open whether it was a dream or not. Other then that little filler the rest of the story is is fast past and someone dies, someone comes back and all that good stuff the drama is amp up to the highest level as well as the action. What can be forgivable is the time traveling related stuff these geeks help get the pride together by accidently bringing a member from the past to their time. While this is forgivable going back 18 months into a flash back is very annoying and confusing once the who's whats when's wheres and why's are out of the way however this story still falls flat like well like a bunch of geeks messing with something they shouldn't mess with while this makes for a nice story these new characters really do nothing to help the story. This story moves the plot forward while also hitting a reset button of sorts the story isn't new or playing up to it's strengths it's just playing around with characters and a story that could be a filler in a way C+

Cover: Very scooby-doo with bright flat colors and uber cartoonish group shot of them all hugging each other and it's titled slightly and we see more of the sky then the group shot easiest the weakest cover out of the 11 comic digests D-

Rating: T for Teen

Company: Marvel

My rating : 3 of 5. Another one with two pages missing from the copy. Which of course makes a ruins a vital scene and I might have missed a kiss scene to add to my list all because one page was ripped out! That upset me greatly. The story over all while a tad confusing at first was really well done in the long run there was also a character death which was sad though I didn't cry only because I was missing a page! So idk how that scene ended exactly if it ended where it did or not over all though the story was a tad so so and the art work was horrid ugh it was bad! Really want to see what happens next though

Kiwi: Ouches.

Started off a bit slow but I liked watching Molly come into her own a bit.

Karolina coming back! Yaaay. I was so pleased to see a storyline with her again. I also really like how Xavin's genderfluidity is portrayed. And getting to see an interspecies, interracial queer relationship with one character so genderfluid is really frakking cool. I do miss Karolina in her old clothes so I hope she'll be wearing something other than her wedding dress in some of the upcoming material.

Gerti going out! Ouch. I can see why it happened and why they did it, I guess, but I thought they could have planned it another way. Hard to see her go after seeing her grown up and thinking that she'd make it--which is probably why they did it, just to prove that time doesn't work that way and there are no assurances. I did have a feeling something tragic would happen to her; I just didn't think it would be this.

Definitely still enjoying the series.

velma: WHAT THE @\$% I CANNOT belIEVE They [\(view spoiler\)](#)

aggressively acquires the next volume["br"]>["br"]>

Caitlin: In quantity 6, the Runaways discover who has been best the recent satisfaction which has been retaining tabs on them and lose certainly one of their participants in a foul war of words with their enemies. whereas I loved the war of words and the issues it offers for the Runaways, there has been an excessive amount of youngster drama during this one for me. (view spoiler)[and will an individual clarify to me how precisely Ultron's "son" was once in a position to being hacked by means of a few random desktop geek? i've got a difficult time believing an AI like Ultron may make his progeny that vulnerable. (hide spoiler)] worthy interpreting for the alterations it brings to the group yet now not my favourite within the series.

Mairi: one other enjoyable Runaways story. Karolina returns, even supposing we get much less of her concepts approximately what her lifestyles as turn into than i might like. the most tale supplied a pleasant tie again to the unique Runaways plot. whereas the finishing was once tragic, for no matter what cause it did not have an identical emotional effect to me as i'd have hoped. (Perhaps, simply because this being comics, lifeless humans usually are not constantly inevitably dead. possibly this'll be an exception.)

James: the runaways, written by means of brian k. vaughan, is basically the most effective new comedian sequence in fresh memory. the tale of a gaggle of kids, every one possessing their very own special powers, who discover their mom and dad are supervillians and choose to run clear of domestic to deal with it, is stuffed with the type of teenage angst and allegory that the vintage superhero books are drowning in (spider-man & the x-men, anyone?). not to say the paintings (in this assortment all performed by way of adrian alphona), which hits each word in a sketch-y yet subdued type that is essentially motivated by way of manga, yet not at all ruled via it. it additionally borrows from the straight-lined, square-jawed sort of the 50s and 60s. the in simple terms factor is that, as page-turning and gasp-inducing and interesting because the sequence is, it hasn't been capable of re-capture the teenage-hormones-in-a-jar pleasure of the 1st series, and this assortment is not any different. with anything as on-going and ever-evolving as a comic book series, very like with tv, you are going to have your ups and downs (kind of like brian k. vaughan's present television activity on lost), and if i have been score the sequence as a whole, it will most likely get a five, yet in response to the books contained here, i am afraid it really is only a four.
