## Description

Come take a sacred journey. " Meg Crane has never had a longing for adventure. She's never even traveled more than two hundred miles from home. But when she receives an invitation from the New Hope Retreat Center to travel deeper into the heart of God, Meg finds herself saying yes.

Against her better judgment.

What will she discover if she begins to walk the winding path through the broken pieces of her past?

Meg isn't the only one who feels apprehensive about the journey. Though the other people gathered at New Hope appear to have life well put together, each of them has a story to tell.

Join Meg, Hannah, Mara, and Charissa as they become unlikely companions on the road to healing, transformation, and self-discovery. Because the long walk leads through the unpredictable terrain of the inner life, the travelers will need courage, patience, perseverance, and of course...

"Sensible Shoes.

## Insightful reviews

Jacqui: I wanted to love this book. I wanted it to speak to my own life and spiritual journey, and that of my friends. Unfortunately, it did not. It is very, very heavy on the retreat exercises - parts of it read like you should be doing it - and as a result the characters are underdeveloped stereotypes. And there is very little resolution at the end. For example, one character's husband is verbally abusive to her and remains so at the end. No redemption, no change. Parts of it are really touching and meaningful, and I did a little bit out of those, but there just was not nearly enough story to go with the religion.

Mary: I loved this book. It tells the story about the spiritual journey of four different women. The book is not only an excellent character study, but it also goes through all of the spiritual exercises that the women in the book are going through and how each react to them.

If you enjoy Christian reading and are looking for the journey, this is an excellent read. I personally got a lot out of it, plus I enjoyed the story.

Reader received a complimentary copy through the Good Reads First Reads program.

Aneta: The best book I've read in a long time! Four women go on a spiritual retreat and learn so much about themselves and how God speaks to each of them in the hard places they are in their lives. I loved learning about the classical spiritual disciplines along the way, and felt like I was part of the group, listening and learning. I learned more about how much God loves each

one of us and how He speaks to us uniquely. LOVED this book.

Sandra Strange: This Christian ebook lines the transformation of 4 girls dealing with numerous demanding situations from their prior and during religious routines and plenty of mentoring of every other, conquer these demanding situations through relocating extra deeply into Christ's love. you should have a Christian orientation to benefit from the book. for those who do, you could fairly delight in these non secular workouts targeted within the novel. The tales of those women are enticing and fun.

Shelly Hammond: when you are keen on Christian fiction, notion frightening books, and good written tales you'll likely locate this to be the publication for you! you could inform from the beginning the writer places loads of love and idea into each note she places down onto the pages of the book. this can be the 1st Christian fiction booklet i've got ever learn and that i came upon that it was once an relaxing booklet that takes the reader on an unforeseen trip with 4 ladies trying to locate themselves and to discover how you can come to phrases and care for their pasts and currents events and during this e-book they locate this fashion via God. I dislike giving information of a publication away previous a number of beneficial properties concerning the genuine tale and the writing of the writer yet i'll offer you only a tiny little bit of details prior to by surprise preventing since you may still , as I continually say if you've ever learn one other of my reviews, learn the ebook for yourself! It's solid to learn the entire books for your self irrespective of what. learn them all! Ok, sorry. I obtained a bit misplaced there. I'll come back to it now. The booklet occurs in Michigan at a retreat center. 4 ladies meet there once they arrive to; good you know, retreat and stuff. they've got issues that they're having a few difficulty with in order that they head to this retreat. via all of it they develop into toward one another and likewise to God. There are a few workouts in the booklet they perform and locate they're getting nearer and in the direction of God. while you are Christian and stick with the God thing, you'll locate that they're really useful to you to boot and should assist you together with your personal existence also. the writer is a very extraordinary writer. She has a method of writing that attracts you in and retains you correct there with her. It's as though the characters she writes are as genuine to her as an individual that she is familiar with within the relatively genuine world. they're so relatable and wealthy with personality. It's as though they're residing at the pages. The environment of the tale is one other factor that comes alive. As you learn you could photo it on your brain as though it's a spot you've noticeable or can see in case you simply move round a corner. It's rather well written. All in all, i actually loved this book. i'm going to say back that it's a Christian fiction e-book simply to remind every body in the market in case somebody relatively reads this yet no matter if you're not Christian or into that, it truly is nonetheless a truly relaxing learn and intensely good written. I hugely loved it and that i could suggest it complete heartedly.

Joy: an artistic option to introduce the non secular disciplines. i believe somebody may perhaps relate to at least one of the 4 ladies if now not a mixture of the four. It additionally gave a glimpse of what it's to have non secular friends--friends who proportion within the trip towards deeper, transformational dating with Jesus. i'd suggest it.
