Description

Returning to visit his aunt, Smax is threatened with death by boredom at his uncle's funeral, must avoid marrying his sister and must unravel the mysteries of his dragon-slaying past which happens to contain an encrypted warning to his cop partner, Robyn! All that, and he has to avoid being mugged by bunnies too!

Insightful reviews

Aaron: Top 10 related book by Alan Moore that's just as fun as either of the first two collections. The main thing that was lacking was all of the other Top 10 characters that I love so much. The story was pretty good and incredibly fun (quite Bone-esque, also). Very funny, as well. A lot of the frames feature references/homages to both popular and obscure fantasy characters of past and present, which I loved. Totally good.

Shane: I love Alan Moore but have to say this is probably the book of his that I least enjoyed. I can handle silly as long as it's funny - this was mostly silly and only occasionally funny (to me). The main villain was interesting and cool. The solution to the problem was interesting if a bit of a stretch. The art was okay.

So if you're an Alan Moore completist, read it. If you're looking to sample Alan Moore look elsewhere (I would suggest Top 10 or the Watchmen).

Federiken Masters: Spin-off de Top Ten que leí antes que su precuela y que me resultó mucho más divertida. Lástima que el dibujo de Cannon no esté al nivel del de Ha, pero su estilo más desprolijo y feísta sirve -y mucho- para la historia. Ahora que la bella Bucletina me lo regaló en papel seguro lo relea y lo rerreseña.

Speedtribes: The paintings wasn't my most well-liked variety - having been spoiled by means of the prettiness of Gene Ha's paintings within the typical sequence - even though I did be capable of acclimate myself to simply in time for the particularly impressive finale. Incest is an incredible squick of mine, and never one who i might be breaking prior any time soon. i believe i might have loved the tale way more with out that additional element.

Magic Mike: this is often a wierd tale that's very various than the remainder of the pinnacle Ten series. it's okay, yet now not at the related point of the unique best Ten sequence nor the prequel. commence with most sensible Ten books one and after which learn the prequel. in the event you needs to understand greater than choose this up. There is additionally a most sensible Ten season 2 which Alan Moore was once no longer concerned with. i have never learn that but so i am not definite the way it stacks up.

Dan: Smax is a quick, yet pleasant tale of fairytales, science, and an old style hero's journey. the tale is not as dense as most sensible Ten yet keeps an analogous stability of humor and drama. It does not stand with From Hell or Watchmen , yet Smax is a very good addition to Moore's best Ten canon.
