## Insightful reviews

Adan: The most adventure-y Tintin so far, with the young reporter getting shot on the first page! Herge's tropes are becoming pretty formulaic, so I may have to take a Tintin break after the next one, but this was the most fun book so far. It really doesn't get better than a Snowy drunk on Scottish whisky for about ten pages :D

Jake: Honestly, Tintin is like the Archie comics with balls. It's playful and innocent, but it still includes whiskey and guns. It brings you into the era it was written and you feel like some imaginative boy in 1930s Belgium reading this at night, saying things to yourself like, "oh boy!"

Tintin and his faithful dog Snowy foil a gang of counterfeiters and they do it by car, train and plane. Tintin ends up in the hospital twice and never lets his hero boy reporter instinct keep him away from figuring out the truth.

It's the first Tintin adventure tale I've read and I'm sure it was more ground-breaking when it debuted. I can see how this sense of adventure came to influence other storytellers of the 20th Century. It was fun and it reads like a serious throwback, though it's actually what anything from the last 50 years was referencing.

It was a lot of fun, though I thought it was leading to a bigger finale, but the Tintin comic strip started in 1929, so this was before the era of "we need a big twist." It's just a innocent but pleasantly wild, sometimes funny, straight-forward, do-the-right-thing-at-all-costs, mystery-solving adventure serial.

Sookie: One of the finest Tintin adventures with tiny plot but lot of action adventure scenes. Its a fun ride with a minimal cast and witty execution.

Nicholas Whyte: <http://nwhyte.livejournal.com/2206408.html>[return][return]The Black Island is a bit a step backwards for Tintin; he's shot and wounded on the 1st page, after which he chases a gaggle of forgers to Scotland by way of a chain of inconceivable incidents concerning a variety of techniques of delivery and defeats a gorilla in a ruined castle, all of which is hindered by means of the bungling detectives Thomson and Thompson (who in equity get a few strong traces here). One wonders why a person could visit the difficulty of forging Belgian francs in Scotland (or certainly at any place at all); the elemental plot, of a felony conspiracy being unmasked, is extraordinarily just like Cigars of the Pharaoh and Tintin in America, although the tale is on more secure floor via mocking the British instead of Arabs, Indians or local Americans.

Dianna Caley: Lizzy and that i simply entire this one. She and that i are quite having fun with studying the sequence together. This one was once very funny and especially humorous whilst Thompsen and Thomson unintentionally commandeer a mechanic rather than a pilot to fly their plane.
