Description

The Elephant and the Dragon takes a compelling look at the major changes in store as America faces increasing competition from two emerging Asian giants, India and China. In it, Robyn Meredith tells how these two Asian nations, each with more than a billion people, have spurred a new "gold rush," and what this will mean for the rest of the world.

Insightful reviews

David: This is a good book to read after "The WalMart Effect" to get a perspective on world economy and changing economic stability. China's transformation came through taking advantage of the hoards of cheap labor to manufacture or assemble products; while India has managed to create a remarkable industry of computer software developers and call centers. How these transformations came about, what effect they have had and are having on both the US and the local economies in those countries, and what the future might hold for the three countries - all this makes for some very interesting and thought-provoking reading.

Toni Daugherty: I learned so much about the global economy reading this book. It's important to understand the political, religious and economic backgrounds of the players involved in the global market, in order to understand and predict what may happen with future world trade and future jobs. Meredith does a good job giving us both the background and some predictions that may prove true. She helps one think on a global scale when trying to understand purchase power, economies, gross national product, job growth and loss and especially the importance of education and innovation to prevent slacking economies in countries that can no longer afford to have protectionist policies with regard to jobs and consumer spending.

Kayla: This publication is so painfully superseded i'm really not truly capable of get earlier it. Like many books approximately present affairs and economics, this booklet had a transparent date it was once stable until, and that date used to be in 2008. factor have persisted to alter at this sort of quick rate, that the one rather proper components of the e-book have been the elements the place the writer addressed how issues had turn into this way, as the background has no longer changed.

Kevin: Good, informative read. might have been a bit shorter...tended to copy itself. China is the world's blue-collar producer because of it really is funding in infrastruacter and never-ending reasonable labor. India is the world's white-collar provider a result of availability of many college-educated wokers at decrease wages than the West. thousands upon hundreds of thousands of individuals within the East are emerging out of poverty for this reason yet on the fee of Western jobs. White collar jobs that you just wouldn't have to be bodily current to accomplish will proceed to go away the US, so make your occupation offerings wisely. the U.S. lifestyle is screwed if we do not re-train, commence acting larger in our k-12 schools, and put money into R&D to maintain inventing the following titanic issues (i.e. web increase within the 90s/00s.). Protectionism will not paintings either. See Europe.
