## Description

What secrets lie behind the doors at Misselthwaite Manor? Recently arrived at her uncle's estate, orphaned Mary Lennox is spoiled, sickly, and certain she won't enjoy living there. Then she discovers the arched doorway into an overgrown garden, shut up since the death of her aunt ten years earlier. Mary soon begins transforming it into a thing of beauty--unaware that she is changing too. But Misselthwaite hides another secret, as Mary discovers one night. High in a dark room, away from the rest of the house, lies her young cousin, Colin, who believes he is an incurable invalid, destined to die young. His tantrums are so frightful, no one can reason with him. If only, Mary hopes, she can get Colin to love the secret garden as much as she does, its magic will work wonders on him.

## Insightful reviews

Rebecca Recco: This is my favorite book, ever! My Mom made me read it as a kid, and I really didn't want to. I put it off and put it off, and finally decided to just suck it up and read it. I think it took 10 pages for me to get completely hooked.

I think I loved the book so much because it was all about bringing about life and growth through love. All the main characters are sort of "forgotten" in some way or another, and they go on this adventure when Mary finds a key to a secret, walled garden. The garden had been locked up and forgotten about and so when they find it, it is dead and grown-over with weeds. They sneak in and tend to it, little by little, and it comes back to life in full splendor.

The storyline becomes sort of a metaphor for life, itself. Even in the bad times, you can make it into whatever you really want it to be. The same is true for the people around you -- you can nurture the lost and forgotten and help them to bloom.

Dem: Having read *The Secret Garden* as a child I really wanted to read this book as an adult to see would I still feel the magic of the story many years on. Well I felt the magic just as I did many years ago.

This is a beautiful book and so well written, it has everything a story needs to fuel the imagination of a child, a big rambling house set on the moors, a secret garden, a couple of spoiled children and a big family who value life and friendships and put others needs before theirs.

I escaped in this book and although I knew the story and the outcome I loved every page as the writing is so descriptive and the characters so well drawn that this book comes alive. I have seen the film several times of the secret garden and yet reading the book the characters and places took on a completely different image which was great as Frances Hodgson Burnett really knew how to capture her readers.

So glad I picked this book to read again, as a good story, well written never grows old.

Kathleen's assessment Frances Hodgson Burnett might supply Anthony Robbins, Jim Rohn, and Brian Tracey a run for the money within the quarter of motivational messages. there isn't any denying the underlying message of this story: your lifestyles is what you're making of it. I enjoyed looking at the transformation of miserable, obnoxious Mary right into a positive, outgoing child; full of the average interest and zest for all times that every one kids have yet which have been squelched out of her by way of her lifestyles in India. From her efforts to benefit to 'speak Yorkshire' to her involvement with the backyard and all its creatures, Mary was once like a blossoming flower. Her attachment to the sickly Colin and how she pulled him into the daylight was once actually beautiful. I needed to chuckle to myself while the kids begun doing their day-by-day affirmations...seriously, it used to be so candy and much more attractive than all of the own development experts placed together. it is a tale written for kids and adults alike, a real delight. I listened to the model narrated by way of Ashleigh Jane, even if there are different model to be had at the Libravox website.
