Description

From the depths of Space a new foe rises to do battle with mankind: the British Space Empire is threatened by the lemming-people of Yull, ruthless enemies who attack without mercy, fear, or any concept of self preservation. At the call of their war god, the Yull have turned on the Empire, hell-bent on conquest and destruction in their rush towards the cliffs of destiny. When the Yullian army is forced to retreat at the battle of the River Tam, the disgraced Colonel Vock swears revenge on the clan of Suruk the Slayer, Isambard Smith's homicidal alien friend. Now Smith and his crew must defend the Empire and civilize the stuffing out of a horde of bloodthirsty lemming-men—which would be easy were it not for a sinister robotics company, a Ghastr general with a fondness for genetic engineering, and an ancient brotherhood of Morris Dancers—who may yet hold the key to victory.

Insightful reviews

Emilie: I'm supposed to give five stars, says T, because it was a present from him. Now let's keep things into perspective. It has lemmings and insects in it and a place called New Luton. I rarely give a fiver to 'harmless fun'.

Cynthianna /Celine Chatillon: They're furry and they belong in a cage to deal with their rage. Space Captain Smith is destined to battle the Yull, homicidal/suicidal rodent-like aliens, and prevent them from taking over British Space in *Wrath of the Lemming Men*. The same crazy crew of the *John Pym* is back, and the camaraderie is the high point of this third action tale. Polly the Simulant is sent on an undercover mission to teach other androids the basics of self-defense and learns a bit more about Jane Austen than necessary. Surak the Slayer seeks revenge against Colonel Vock of Yull, and Rhianna the Space Hippy gets a chance to learn more about her Vorl father. Major Wainscot and the members of DOG come out fighting with panache and occasionally no pants. All the while, Smith handles the violence with typical British reserve along with, of course, tea. Hopefully we'll see more adventures with these characters to come.

Paul: Another hilarious instalment. Looking forward to the next one!

Paul Tisserant: one other extraordinary supplying from Toby Frost. plenty of laughs and many rollicking house action. The Lemming males is a needs to read!

Paul: The 3rd of Toby Frost's comedian steampunk space-operas is not the most powerful within the series. even if the radical does have lots of surely humorous moments, there are fewer than within the past outings. Also, this publication is especially a lot the 3rd a part of a trilogy and also you do have to have learn the 1st novels within the sequence to be relish it. Frost has created an absurdly humorous universe with those novels yet now can be a great time for him to extend or swap the important forged a little.

Ben: one other enjoyable installment within the area Captain Smith series. whereas the plot fails to make loads of feel in a few places, this isn't a tremendous flaw, contemplating the kind of

publication it's - specifically a foolish pastiche, within the most sensible culture of hold On. i used to be quite amused whilst almost immediately after considering this, I encountered the nature of C'neth, at once out of Doyley Wood. There are a number of terrific double entendres and in-jokes, a couple of which can go the extra overseas reader by, and that i guffawed out loud no less than two times whereas reading. Very British-centric, it's a strong learn if you benefit from the absurdities of Empire and be aware of great cup of tea will placed every thing again on track.
